AB

**Quality
Made in Germany**

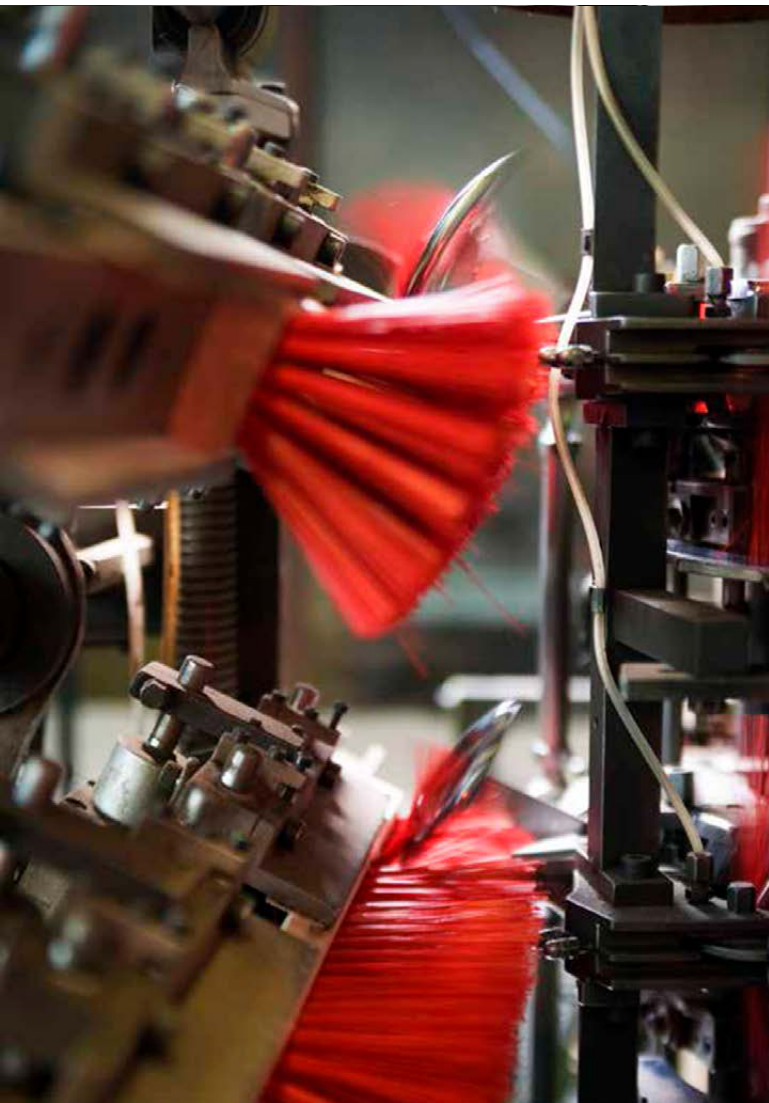

About us

For over 70 years we have been producing, AndreasBürsten in Aurich, brooms, brushes and cleaning aids for various trade forms. Our production is with state of the art CNC controlled high speed machines equipped so that we offer them consistent top quality at reasonable prices.

The manufacturing capacity ranges from medium to large series. In addition to the self-made items "Made in Germany" the majority make up our production range, other products are managed, which complement the delivery program.

We regularly expand our program with newly developed, innovative products and are for your individual wishes and custom-made ideal contact person. Proximity to the customer remains our primary goal.

Printed brooms & brushes

We are happy to print your brooms and brushes individually with your logo. Just ask!

Painter accessoires

 Note

1691	Tarps, plastic, HDPE, 5 x 4 m	50
1386	snap off knife, metal blade guide, 9 mm blade	24
1387	snap off knife, metal blade guide, 18 mm blade	24

Painter roller and brush are best cleaned with water with the addition of some vinegar or spiritus. After cleaning, the painter rollers or brush should be kept hanging as possible.

During a break from work, we recommend the painter rollers and brushes in a plastic bag or wrap in some cover sheet. This prevents the drying or drying the painting tools.

Equipment

Note

1389	broom comb, wood	10
2408	Quick-fast-holder, plastic, black, individually	
2508	metal holder, for screw on, Ø24 mm, long hole	20
25081	metal holder, for screw on, Ø28 mm, round hole	20

7950	wood, black metal bristles, scratch, handle 140 cm, Ø28 mm	30
7970	wood, brass metal bristles, scratch, handle 140 cm, Ø28 mm	30

Arenga

A coarse, black, and highly durable plant fiber from the Asian sugar palm, *Arenga saccharifera*. The fiber is water-resistant, oil-resistant, and known for its long service life. Arenga is used in industrial and hall brooms for rough surfaces such as halls, workshops, and stone flooring, both indoors and outdoors.

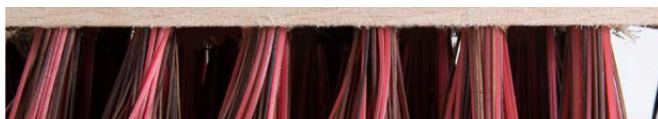

Arenga-Elaston-Mix

A natural-synthetic fiber blend of arenga and Elaston. This fiber blend perfectly combines two sweeping characteristics. These brooms remove both coarse and fine debris at the same time. The arenga-Elaston blend is used in Saal brooms for all outdoor areas.

Bahia

A dark brown, coarse, and elastic plant fiber from the Brazilian palm tree "Attalea funifera." This palm tree grows primarily in the moist, sandy soils of the eastern Brazilian state of Bahia, which is where the fiber gets its name. Bahia fiber is used in street brooms for outdoor and construction applications.

Bahia-Elaston-Mix

A natural-synthetic fiber blend of Bahia and Elaston. This fiber blend enhances and supports the sweeping performance of Bahia. The Bahia-Elaston blend is used in street brooms. These brooms are ideal for removing coarse debris outdoors.

Bristle

A light-colored or black natural animal product derived from European or Chinese domestic pigs. Bristles are heat-resistant and have the ability to absorb and release grease. Bristles are used in bath brushes, massage brushes, hand-washing brushes, bottle brushes, and shoe brushes, as well as in paintbrushes.

Elaston (Eralon)

Red synthetic bristle made of "polyvinyl chloride." Relatively dimensionally stable and heat-resistant up to approximately 60 °C. The hardness of this bristle depends on its diameter. Elaston is used in hall and street brooms for all outdoor applications.

Hair-Mix

A blend of fine synthetic hair mixed with other synthetic fibers, sometimes containing horsehair (depending on the customer's preference). This hair blend is used in inexpensive room and hall brooms, as well as in hand brushes. These brooms are suitable for indoor use.

Coko

Light brown plant fiber. Coconut fiber comes from the fruit of the coconut palm (Cocos nucifera) and is extracted from the outer husk of the coconut. Coconut palms are primarily native to Sri Lanka and India. Coconut fiber is used in industrial and hall brooms, as well as in hand brooms for coarse and dry debris, both indoors and outdoors.

Synthetic fibers (Myprenfibre)

Yellow synthetic fiber. Relatively dimensionally stable and heat-resistant up to approximately 80°C. Synthetic fiber is used as an inexpensive alternative to Mexico fiber in scrubbers, mops, and scrub and dish brushes for indoor and outdoor use.

Mexican-Fibre

Mexico-Fibre is derived from the leaf veins of the agave plant "Agave lechuguilla," which grows on the Mexican high plateau. These fibers are sturdy and resistant to heat, acids, and alkalis, and are also gentle on the skin. Mexico-Fibre is used in scrubbers, mops, scouring brushes, dish brushes, and personal care brushes.

Nylon

High-quality, white synthetic fiber "Nylon 6.6." Nylon is highly abrasion-resistant, durable, and heat-resistant up to approximately 120°C. Nylon is used in high-quality brushes for all wet areas.

Ossi-Blitz-mix

A natural-poly blend of arenga and white polypropylene. This fiber blend combines two sweeping properties into one. These brooms remove both coarse and fine debris at the same time. The Ossi-Blitz blend is the eco-friendly alternative to the arenga-elaston blend. The Ossi-Blitz blend is used in outdoor and garden brooms.

Piassava

Brown, coarse leaf stalk fiber from the West African Rahia palm. Piassava is used in street brooms for heavy-duty cleaning throughout outdoor areas.

Polypropylen (PPN)

It is usually a white, flexible synthetic fiber that is abrasion-resistant, waterproof, and heat-resistant up to approximately 90°C. PPN is used as an affordable alternative to nylon in scrubbers, mops, scouring brushes, and dish brushes for both indoor and outdoor use.

Polyester (PBT)

High-quality synthetic fiber "polybutylene terephthalate," a synthetic fiber that offers maximum abrasion resistance, UV resistance, and is food-safe. It is heat-resistant up to approximately 134°C and can therefore be sterilized at high temperatures. Polyester is used in hygiene brooms and brushes for the food industry as well as in hospitals.

Horsehair

Fine, black natural hair from a horse's tail and mane. Horsehair is very elastic and effectively traps dust. Today, it is mostly sourced from South America. Horsehair is used in room brooms, hall brooms, dish brushes, and hand brooms for picking up fine debris from smooth floors. These brooms are particularly well-suited for indoor use.

Union

A blend of bassine and Mexico fiber or synthetic fiber. Very stiff and coarse bristles for heavy soiling. Union is used in scrubbers, mops, and washing and scrubbing brushes for heavy soiling in wet, indoor, and outdoor areas.

The following terms and conditions apply to all deliveries, unless otherwise agreed. Any conflicting terms and conditions of purchase on the part of the buyer require our express written approval. Verbal agreements, statements and assurances require our written confirmation.

Prices

Prices and delivery terms are subject to change. We reserve the right to adjust prices in the event of cost increases. The statutory value added tax will be added to the net prices stated in this list. All previous prices are superseded by this list.

Delivery and Packaging

Delivery is ex works. Goods may only be accepted in complete packaging units (PU). Special packaging and other services must be agreed separately and are subject to an additional charge.

Items with a total length of over 1.70 m are classified as bulky goods. Higher delivery charges apply to these items. The amount is due within 10 days with a 2 per cent discount or within 30 days net free to the boundary.

If the buyer defaults on payment of an invoice, all undelivered items remain due immediately. The same shall apply in the event of the non-honouring of bills of exchange or cheques, refusal of payment, packaging or the buyer asking for a quantity from that point onwards. We shall only be obliged to make further outstanding deliveries to the buyer against advance payment or the provision of security. Furthermore, we shall be entitled to terminate the contract, to withdraw from the contract or to place goods in non-acceptance. A second delivery will incur additional costs. Payments shall be applied to the oldest outstanding debt. If the above-mentioned payment deadline is not observed, interest on arrears at a rate of 1% per month or part thereof may be charged.

Retention of title

Delivery is subject to retention of title in accordance with Section 455 of the German Civil Code (BGB), with the following additions.

The goods remain our property until all our claims against the buyer have been paid in full. In the case of payment by cheque or bill of exchange, payment is deemed to have been made only upon final honouring of the payment instrument.

The retention of title shall also apply if the seller's invoices are included in a running account and the balance has been struck and acknowledged.

The retention of title is subject to the condition that ownership shall pass to the buyer upon payment of all the seller's claims.

The buyer may dispose of the goods only in the ordinary course of business, but may neither pledge them nor assign them as security.

The goods must be stored separately and, at the supplier's request and for a valid reason, must be labelled.

Resale is permitted within the scope of normal, proper business operations, provided the buyer has fulfilled their payment obligations to the seller. The buyer hereby assigns to the seller, in advance, the full purchase price claim arising from the resale of the goods against the purchaser.

Delivery times

Delivery obligations and delivery deadlines shall be suspended for as long as the buyer is in arrears with any payment. This shall not affect the seller's claims for damages (e.g. loss of profit).

In the event that doubts arise as to the buyer's solvency, we reserve the right to make further performance conditional upon the provision of security.

Delivery deadlines quoted by us are not legally binding. Partial deliveries are permitted and shall be deemed to be separate deliveries.

Claims for damages arising from delayed delivery are excluded. Force majeure, operational disruptions, labour, energy or raw material shortages, difficulties in procuring production materials and spare parts for machinery, strikes, lockouts, transport

disruptions and orders from public authorities shall release us from our obligation to deliver for the duration of the disruption and to the extent of its effect. They shall also entitle us to withdraw from the contract in whole or in part.

Defects and warranty claims

The buyer must immediately note any complaints regarding quantity and quality on the consignment or delivery documents issued by the haulage contractor or parcel service, and must raise such complaints with us in writing no later than eight days after the goods have been received. Our liability shall be waived if defects are not reported in good time or if unauthorised alterations are made to the goods. In the event of justified complaints, we shall, at our discretion, have the right either to take back the goods and issue a credit note for the amount charged, or to provide a replacement free of charge within a reasonable period, or to credit the buyer with the reduction in value of the goods. Any further claims arising from liability for defects or claims for damages on any grounds whatsoever are excluded.

Place of Performance and Jurisdiction

The place of performance and exclusive place of jurisdiction for delivery and payment, as well as for all legal disputes, is Aurich. The law of the Federal Republic of Germany shall apply – including in the case of deliveries to customers abroad.

Reisstrohbesen

These brooms in particular must be checked meticulously upon receipt. We dispatch these brooms in perfect condition. Damage caused by mice or other factors whilst in your warehouse does not entitle you to an exchange or replacement. We do not accept returns. We do not accept any price reductions.

Handles

We supply these in perfect condition; however, should they have warped whilst in your warehouse due to weather conditions or improper storage, we cannot accept them back. Exchanges or price reductions are therefore not possible.

Miscellaneous

All dimensions stated in the catalogue are approximate. We reserve the right to make changes to dimensions and materials, and to make colour variations.
